Web Technologies	Django, ReactJS
DataBase	SQLite
Tools	Git, VS Code, Jupyter
Other Skills	HTML, CSS, Bootstrap, WordPress

Projects

Swift-Cart

Dec 2022 - Feb 2023

E-commerce, Personal Project

- I successfully designed and implemented a robust e-commerce website utilizing the Django web framework. By leveraging my expertise in both front-end and back-end technologies, I crafted a seamless and responsive online shopping experience.
- As the sole creator of this personal project, I gained valuable insights and expanded my skill set by successfully implementing various features, including the integration of payment gateways. This experience was instrumental in broadening my understanding and proficiency in web development.
- Technologies used: Django, Python, JavaScript, HTML, CSS, Bootstrap.

NetCoreInfo

Sept 2023 - Oct 2023

Designed and built the landing page of a website, encompassing both front-end aesthetics and comprehensive back-end functionalities.

- Conceptualized and crafted a visually appealing landing page that adeptly conveyed the brand's message, captivating visitors' attention. Utilized a user-centric design approach to elevate the overall user experience.
- Seamlessly integrated the landing page with pertinent Django apps, including authentication systems and content management systems, to augment functionality and optimize user interactions.

We-Connect

Aug 2023 - Sept 2023

Group video calling website (Personal Project)

- Engineered a high-performance Video Calling Website tailored for group interactions, emphasizing seamless and responsive communication experiences.
- Implemented **WebRTC** technology to facilitate high-quality, low-latency video and audio communication between users, ensuring a seamless and responsive experience for participants engaged in video calls.
